Installation Steps

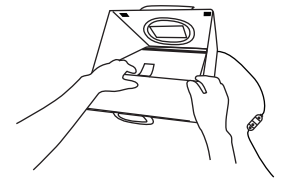

Beginner photography:

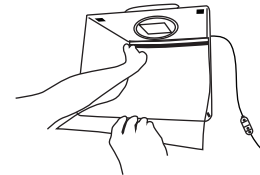

1. Put all of the accessories out.

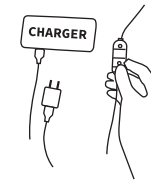

2. Expand the light box.

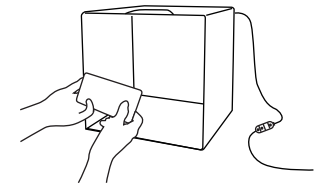

3. Lay down the mounting board in the light box.

4. Insert the favorite backdrop into backside of the light box.

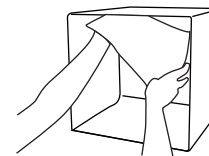

5. Plug in the USB cord and adjust the gear position, making the light to be appropriate state.

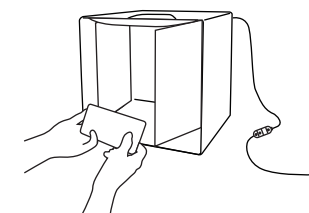

6. Enjoy shooting at any angle.

Advanced photography:

Suitable for products with the props of highly reflecting light and easily showing the contours.
eg: jewelry / cosmetics / ceramics / glasses etc

7. Install the diffuser cloth to soften the light.

8. Place the reflection board on the left or right or both, which can reduce shadows or emphasis on contours.
